1222 is the tale of the way a small crew of individuals locate themselves caught in a inn in the course of an apocalyptic snow storm. Following a dramatic teach derailment at Finse, the clash among the survivors escalates whereas a livid storm threatens the unprotected village. not anyone is there to help, and there's no means out of the inferno for the survivors hiding out. at the first evening on the hotel, a guy is located shot and murdered. The sufferer is Cato Hammer, a clergyman recognized nation-wide for his skill – and hope – to get within the papers. Hanne Wilhelmsen, retired Inspector on the Oslo Police, is drawn right into a race opposed to time, a murderer, and the worst typhoon within the Norwegian alps on record. She loses the 1st round. Soon, one other one in every of God's servants is murdered, whilst an icicle cuts via his body...

again in November, I spent an afternoon using to numerous locations for work, and so was once hearing Radio four and there has been an interview with Anne Holt who I had by no means heard of. She is Norwegian, and so they have been speaking concerning the unexpected approval for Scandinavian crime books, the truth that she turns out lovely scathing approximately Norwegians in her books and her newest booklet that had simply been translated and was once approximately to be published within the united kingdom – 1222. I extra it to my wishlist, and was once thrilled to get an Amazon reminder of it, informing me that it was once to be had on Kindle for the princely sum of £1. Result! Anne Holt herself used to be 1222 (Hanne Wilhelmsen #8) paintings for the Oslo Police division 1222 (Hanne Wilhelmsen #8) and used to be actually Norway's Minister for Justice again within the 90s. This is the newest in her sequence of books that includes detective Hanne Wilhelmson, of which i think there were eight books considering the fact that 1993. She under pressure that this tale simply stood by myself as a story, and that i enjoyed the sound of it, so notion i'd supply it a go. 1222 refers to what number metres above sea point the top station at the oslo 1222 (Hanne Wilhelmsen #8) to Bergen teach direction is. the tale starts off slap bang (no pun intended) within the educate crashing simply open air the station in the course of a snowstorm. Only the driving force dies within the crash and all the passengers are rescued and moved to a close-by hotel. There are only lower than two hundred of them, together with Hanne Wilhelmson. The storm from snow turns into worse, successfully removing any likelihood of rescue, the teach being moved, and any conversation with the remainder of the world. And then, of course, there's the case of the mysterious 'extra carriage' at the teach of which hypothesis is rife! The passengers and lodge employees settle in for what feels like it may be an extended stay, and all in their personalities and so on begin to come out. And then, within the morning, probably the most prolific passengers – a prolific football-loving priest – is located frozen useless outdoor within the snow and ice. however it wasn't the chilly that killed him, it was once a bullet throughout the head. there's a assassin of their midst. In the interview, Holt acknowledged that she desired to write a narrative that had components of the outdated Agatha Christie whodunnits the place the detectives have been in an remoted state of affairs and needed to use their very own detecting abilities with none aid from technology, databases or a team. Well, that's definitely the way it labored – it used to be lovely claustrophobic... the in basic terms factor that didn't relatively paintings for me was once the truth that there have been supposedly a number of hundred

humans there. the tale evidently focused in on only a handful (there have been most likely approximately 15 major characters), and so there have been tens of individuals supposedly 'around' that have been thoroughly uninvolved within the tale yet nonetheless within the remotest situation. Because of the dramatic start, 1222 (Hanne Wilhelmsen #8) and the very descriptive narrative, the unusual panorama and state of affairs and the tricks at what used to be to come, I felt tremendous drawn in from the ebook correct from the 1st few pages – and it didn't 1222 (Hanne Wilhelmsen #8) permit up! i actually loved it. I needs to admit, there has been an entire gentle bulb second for me whilst I felt that I had labored out 'whodunnit', yet not less than you're stored guessing and don't have suspicions proven till correct on the end. there has been only one twist within the story within the final couple of pages that was once a section superfluous, daft and made me groan – it may well have kept away from that, and it additional not anything to the story. Apart from that – brilliant. Tense, varied and good written. I'd supply one other Anne Holt e-book a go!
