BLACK ORCHID

Black Orchid by Karen Harper

Karen Harper

Karen Harper's new thriller, *Black Orchid* strikes with lightning velocity opposed to the luxurious backdrop of the Everglades. A girl investigating the homicide of her husband, an AIDS researcher, unexpectedly unearths herself a objective as well. Now every one clue leads her towards the surprising truth--and to the murderer on her tail.

I enjoyed this book! Quick precis - Jordan lives in Naples Florida and has a flower store - makes a speciality of orchids. Her soon-to-be ex husband is learning wild Florida panthers. Whereas out trying to find orchids, Jordan reveals contributors of the panther crew who've been poisoned via Seminole darts. Her first husband (annulled) is now the executive of the Seminoles. He's framed. She fights to avoid wasting him. Humans round her die. Her relatives is not who they are saying they are. Plenty of problems and an outstanding ending. There has been adequate *Black Orchid* suspense to make me worry for the heroine at times, which I have never present in many books lately. Not anything extraordinarily grotesque simply stable previous type terror. There's a little bit of romance and a small quantity of intercourse - which I assume sells books. Now not absolutely necessary, yet a pleasant touch. Searching for extra books via Karen Harper.
