## **Carrie by Stephen King**

Stephen King

Élevée par une mère fondamentaliste intégriste, Carrietta White, adolescente et collégienne dans le Maine, découvre dans un second de douleur poor qu'elle détient des pouvoirs télékinésiques d'une infrequent force. Rejetant les obsessions religieuses et l'éducation sévère de sa mère, Carrie tentera désespérément de s'intégrer au groupe de jeunes gens composé de beaux joueurs de soccer et de joli pom-pom women du collège. Elle croira même, un courtroom

instant, avoir réussi. Malheureusement pour l. a. ville de Chamberlain, un concours de circonstances va pousser Carrie à se servir de son don pour se venger des humiliations que lui auront fait subir ses camarades de classe. foremost roman publié de Stephen King, Carrie reste un chef d'œuvre du fantastique. Rapide, rythmé, le récit avance comme un bulldozer vers un dénouement annoncé comme inéluctable, et que l'on despatched s'approcher comme un cauchemar. D'autant plus effrayant que très près du réel. --Lisa B.

the one hell that exists is the single we create for ourselves and others. Carrie White has been abused all her life. no longer even allowed to sleep with a pillow, denied all convenience through her fundamentalist mother, taunted and crushed through her relentless classmates, enjoyed through no one: Carrie retains her head down and slogs via lifestyles with deep despair. Until at some point issues change. She will get her first interval within the communal gymnasium showers. She is 17. Being raised by means of a fundamentalist Christian fanatic, she hasn't the slightest clue what is going on on. the opposite women react with rabid and cruel bullying, throwing pads and tampons at her bare body. This is whilst Carrie rediscovers the telekinetic powers she has now not used heavily on account that she was once three. She begins to perform in secret. And this mystery offers her anything she's by no means had before: confidence. She slowly, subtly starts off status as much as her abusive mother. She accepts a date to prom. She defies the foundations she's lived via all her life. She desires to be seen. She desires to be heard. She desires to be accepted. Unfortunately for her, sure bullies won't tolerate defiance. So she kills all people after which herself. I notably keep in mind examining this prior to and after Columbine. After Columbine i believe each person (in the USA, at least) learn this ebook differently. It's vital to recollect that abusing humans has consequences. Bullies appear to imagine that the folk they decide on are Carrie weak. they are going to consistently be submissive. Then they're shocked while the puppy they generally kick bites them. When the recent Carrie motion picture got here out, I do not forget that the Spanish-language trailer continuously all started with an ominous voice saying: CARRIE TIENE UN DON. Which means, Carrie has a gift. Yes, Carrie definitely does have a "gift", so that you can placed it that way. King masterfully creates a 3-dimensional view on power: its manner of supporting you and its method of destroying you. I imagine it's a must to word that during the book, Carrie isn't bodily attractive. She is fat, lined with pimples, downtrodden, and sweaty. i do know why Hollywood insists on cleansing her up and casting Sissy Spacek or Chloe Moretz, yet they're quite pushing it, specially with Chloe, who seems like a cheerleader. Sissy used to be now Carrie not as lovely - yet nonetheless skinny and good-looking. No zits or fats rolls in sight. King's booklet makes it a lot more straightforward to work out what used to be quite occurring and what a bullied aim may perhaps fairly glance like. in addition they make the mummy very skinny (Piper Laurie and the gorgeous Julianne Moore) while within the e-book she is meant to be grotesque and "very large." it is because I favor ebook types to motion picture models 99% of the time. King chooses to intersperse information clippings, journal articles, technology journals, trial files and e-book excerpts all through his novel. This provides to the realism. He creates an international within which this has happened. An "event" that might reside in people's minds for an entire life (again, in actual existence we'd see this with Columbine). I mean, the numbers are atrocious. Carrie kills hundreds and hundreds of individuals and does it with a grin on her face. Carrie isn't a hero. She can be the protagonist, yet this is not a mystical YA novel the place a woman is "special" and "chosen" after which turns into a courageous chief and turns into authorized while she reveals those who find themselves "just like her" and meets a few sizzling boy Carrie who's

additionally gifted. No. this Carrie is often King implementing his darkish brain on reality. this is often what may perhaps rather take place if a bullied, remoted child is "blessed" with this power. King pulls out the entire stops. it really is gruesome, it truly is real, it really is gritty, and it truly is brutal. King doesn't pretty-up this novel at all. The better part is, you realize everybody. From Carrie, to the bully, even Carrie her loopy fundamentalist mother. King permits you to glimpse into the interior concepts of the entire players, preserving not anything again from you. He wishes you to appreciate that those people, these types of people, are human. He rigorously crafts intricate, well-rounded characters which are so reasonable you could nearly see them breathing. King frequently makes women his major character. i am usually requested if he writes girls realistically. i might need to say no...but he does his damndest. i'd additionally wish to indicate that he does not write males completely either. Instead, King creates his personal form of people. King-people, when you will. it is just like the Simpsons. observing the Simpsons, you recognize those characters are meant to be humans. They do human stuff, they appear Carrie the same as humans...but they're not. they're a Carrie little "off" - their hair is weird, their epidermis is weird, they do not precisely stick with the legislation of physics... that's how I see King's creations. He writes wonderful, third-dimensional characters. He exhibits us a number Carrie of the worst components of humanity. yet none of his characters look like humans i've got identified or met in my life. Carrie that's simply because they're uniquely "King." (For example, all King characters swear like sailors the entire time, regardless of who they are. Also, them all have a few kind of sexual hang-up - males AND women. these are only examples.) Some humans won't take pleasure in King's books simply because he's this kind of darkish writer. However, i would like to emphasize that King DOES placed good, truth, love, and braveness into his books. He doesn't create a bleak panorama with no wish (at least now not in CARRIE). Instead, he shall we us recognize that whereas evil could be robust and frightening, solid exists too. The photographs from this ebook are burned into my brain, and doubtless within the recognition of the yankee humans - from the ebook and the numerous motion picture models which Carrie were made. This is the 3rd time i've got learn this book. This isn't King's top book, or perhaps his moment best. I like whilst Carrie is strolling round city with a knife buried to the hilt in her shoulder as though she is Carrie a Necromonger. In closing, studying this Stephen King publication has made me are looking to decrease the celebrity rankings on 90% of my different books. different authors light compared to Stephen King's grasp wordcraft. What else am i able to say? :)
