the tale of the tempestuous romance among display goddess Greta Garbo and society photographer Cecil Beaton--two enigmatic and iconic legends of the 30s. Best-selling writer Souhami has drawn on diaries, letters, photographs, and flicks to teach they either infused their paintings with the attract of androgyny--while concealing it of their deepest lives. a stunning photo of 2 outstanding members and their era. "Compelling reading."--Literary Review. ..."fascinating insight..."--Elle.

This poorly written and extremely uninteresting biography additional demonstrates that Cecil Beaton used to be easily a star\$#@!er who was once in basic terms drawn to Garbo the actress and never Garbo the person--then continuously ponders Greta and Cecil why she is so dull and in Greta and Cecil contrast to her monitor character in genuine life.
